# 1,900

Staff hours saved every year by replacing manual workflows with automation

## Challenges

Manual, decentralized fund reporting processes across a small team

Heavy staff workload for donor updates and fund activity requests

Limited bandwidth to collect and package impact narratives at scale

Growing donor expectations for transparency and timely communication

## Solutions

FundMiner Intelligent Reporting unified fund data and activity into a single platform

Introduced self-service access for fund balances, activity, and documentation

Automated narrative collection workflows, reminders, and report packaging

Partnered with FundMiner to modernize reporting and centralize fund information

## Results

Reduced manual effort and increased visibility across funds

Reduced time responding to fund inquiries and improved fund holder experience

Streamlined stewardship process and improved consistency of donor updates

Enhanced donor confidence through clearer, more proactive visibility into funds

*“We are grateful to FundMiner for their **innovation**, **vision**, and **creativity** in delivering exceptional customer service to our donors and alleviating the workload on our small but mighty staff.”*
